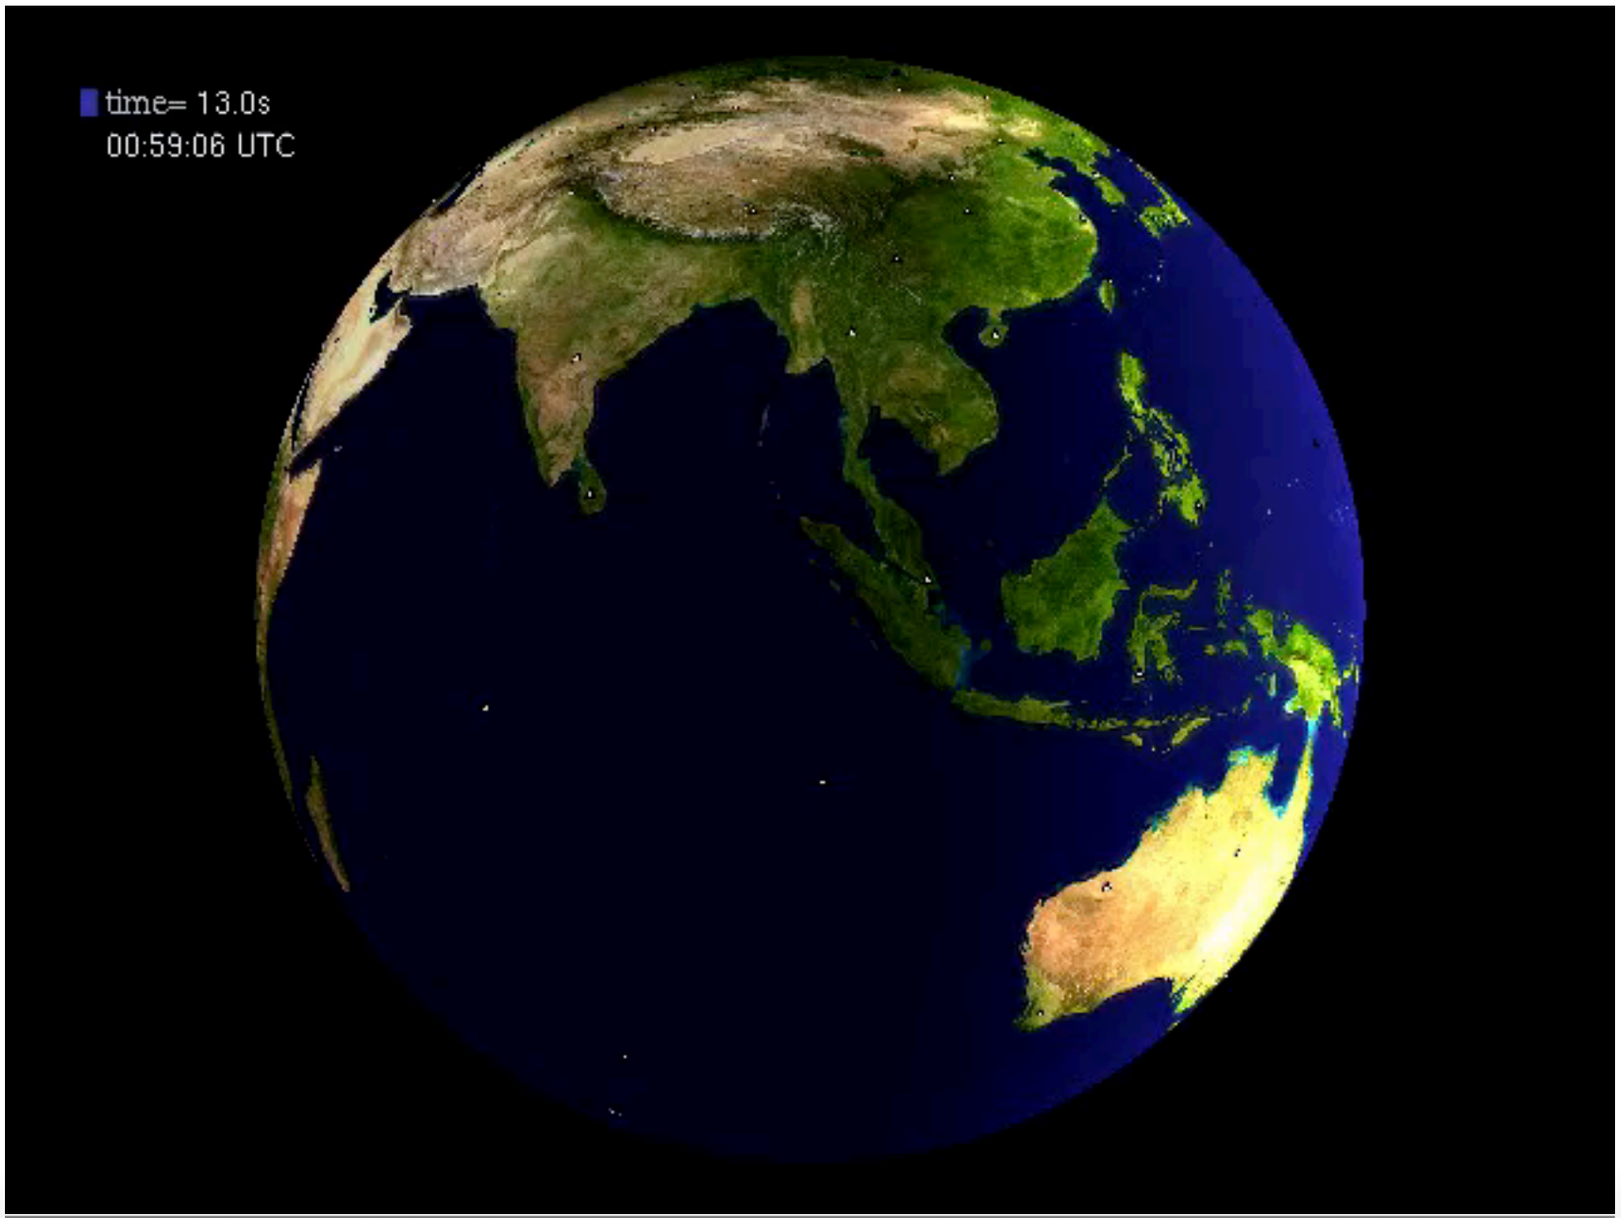
# Computational Geophysics
# ErSE 390C



# Computational Geophysics - ErSE 390C

**Fall Semester 2017**

**Lectures**: - This class will be given as a full semester course
- Language of instruction: English
- Mon/Wed, 10:30 – 12:00, building 9, room 4137
- Lecture material available

**Objectives**:

An introduction to finite-difference, pseudo- spectral, finite-element, and spectral-element methods will be presented and applied to basic geophysical problems including heat flow and wave propagation. The course offers hands-on lab experience in numerically solving partial differential equations relevant to geophysics.

*Students will acquire the skills to program different numerical methods relevant for solving geophysical problems, in particular for heat flow and wave progagation.*

**Instructor**: Daniel Peter
building 1, office #0146

# Computational Geophysics - ErSE 390C

**Fall Semester 2017**

**Schedule**: (tentative)

week 1 Introduction to conservation laws for heat flow and wave propagation

week 2 Finite-differences method for heat flow

- No classes - Eid Al-Adha break

week 3 Finite-differences method for wave propagation

week 4 Higher-order Finite-differences method for tsunami waves

week 5 Introduction to Pseudo-spectral method

week 6 Pseudo-spectral method for wave propagation

week 7 Introduction to Finite-element method

week 8 Finite-element method for steady-state heat flow

week 9 Finite-element method for unsteady-state heat flow

week 10 Introduction to spectral-element method

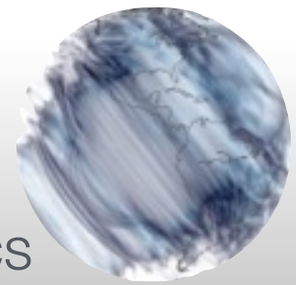
- No classes - semester break

week 11 Spectral-element method for heat flow

week 12 Spectral-element method for 1D wave propagation

week 13 Spectral-element method for 2D elastic wave propagation

week 14 Spectral-element method for 3D viscoelastic wave propagation



# Computational Geophysics - ErSE 390C

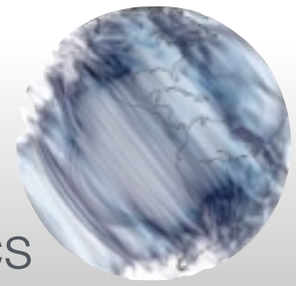
Fall Semester 2017

**Student work**:

Hands-on programming exercises and computer lab reports

**Requirements**:

- Attendance  (highly recommended)
- Grades will be given as follow:
  80% lab reports, 20% oral presentation



# Computational Geophysics - ErSE 390C

Fall Semester 2017
